

Sam Laing, Albuquerque Computer & Electronics Recycling Co.

Statement of Qualifications:

I possess 12+ years in the electronic recycling industry. I am currently the COO and one of the owners of Albuquerque Computer & Electronics Recycling Co. I review and manage financials and report to our board members quarterly the P&L reports. I am also responsible for writing and updating all company policy and procedures.

Goals for the NMRC.1. Awareness of e-waste hazards and risks they impose to our environment. 2. Offer resources to reduce the carbon footprint.3. Help to expand training for facility operator classes to include more in depth discussion and resources regarding e-waste.

I feel I can bring a fresh set of eyes and ideas to NMRC regarding electronics recycling, as most landfills collect this material and do not have an environmentally responsible and safe manner of disposal of e-waste. Reduce, Re-Use and Recycle is key with electronics recycling.

Recommendation:

To Whom It May Concern,

Please consider Samuel Laing for membership to the New Mexico Recycling Coalition. Sam started with Albuquerque Computer & Electronics Recycling Company in August of 2013 and has since shown his commitment and dedication to keeping New Mexico beautiful by working to divert millions of pounds of electronic waste from New Mexico landfills and mesas to certified downstream recycling companies that can properly assess and process the scrap for recycling. Sam's hard work has earned him an ownership stake in the company and has solidified his role as an environmental champion for the State of New Mexico. His knowledge and expertise combined with his passion and outstanding work ethic will be an asset to the NMRC.

Kind regards,

Greg Mullen  
President  
Albuquerque Computer & Electronics Recycling Co.
