

we.  
grow.  
eco. 😊

## ABOUT US

**we.grow.eco** is a coalition which supports & facilitates unifying actions that promote healthy relationships between humans & environment.

how we're doing it

We see a successful path in our mission through a series of linear and relatively small events consistently executed.

Our projects are focused on three avenues in which we want to inspire creative and practical solutions. These avenues are

- **Community Unifying Events**
- **Conservation**
- **Education**

# the walk

March 20, 2021 - January 10, 2022

we had an idea...

that simply coming into communities on foot, vulnerable and open, carrying everything we need on our backs, and engaging positively and non-judgmentally with the folks living there, our interactions will spark the kind of interest and curiosity that can lead to thinking more creatively and critically.
